Contact No. : 9740700887

Prakash has 18 years' of global end-to-end telecoms experience that stretches from participation in 3GPP standards - to implementing the early 3G protocol stack for commercial phones -to providing e2e and cross domain telecom network IP solutions - to building 3rd party developer ecosystems for mobile and network (3G- IMS,FMC) centric services with innovative hosting and business models.

After 12 years of working in several regional senior roles both serving Singapore ICT industry and doing direct selling to operators in APAC, he returned to India in 2007 and founded "Forum Nokia" to build the Nokia India local developer ecosystem. He successfully increased the active developers and publishers with significant initial impact to Nokia App store. In 2009, he became the "Head of Developer Programs" where he successfully revamped Nokia developer programs to profile, attract and convert more than 5000 mobile app developers globally. Entrepreneur bug bite him in 2012 and he started MobiDex360 solutions to help developers build quality applications and also to support building Vibrant local developer ecosystems in APAC.

Prakash's other main focus and interest is in telecom products marketing, building cross domain convergent solutions and e2e 3G network solutions involving OSS/BSS, LBS, unified messaging, mobile payment solutions, service delivery platforms, content delivery and management platforms and VAS. He was instrumental in successfully building the IMS/FMC (Fixed & Mobile Convergence) developer ecosystem and hosting center in Singapore and worked closely with telecom regulatory bodies (iDA) and operators in APAC for improving the 3G Rol.

His goal is to continue working in the industry particularly in his passionate area of working with developers
