Vikram Gupta
SVP and GM, IoT Compute & Wireless Business Line

Vikram has over 25+ years of experience in scaling global organizations to help grow businesses. He has held senior engineering and business roles in a small start-up to industry leading companies.

In his current role as SVP and GM of the IoT Compute & Wireless business line at Infineon Technologies, he is responsible for the P&L, business strategy, product roadmap, and engineering for the 1100+ person team distributed globally. He has managed the business line through a number of changes as the team transitioned from Cypress Semiconductor to Infineon. Prior to this, he has held senior management positions at Broadcom and earlier founded a Sequoia Capital funded start-up focused on developing wireless SoC solutions and saw it through to a successful acquisition.
